Photoshop

Dreamweaver

Lightwave

Flash AS2 and AS3

HTML Javascript AJAX Actionscript

PHP MySQL

General PC desktop support knowledge

General Networking support knowledge

Hardware support for PC and Printers

Photography experience

Work experience overview:

Recent works

I have been working on developing multiple web based products. On these projects, I have been working closely with the programmers on the User Interface Design and in the creation of the general look/feel of the products. I have also put together the ads for our print advertising. I was responsible for the creation of our convention booth graphics.

Overall experience

I have done web design and worked on User Interface on a multi-national web company. I have created many ads, both web and print, for advertisers. I was responsible for the graphics of multiple magazines (citywide and national). I am familiar with working with printing presses and doing deadline projections. Doing photo touchup, restoration, modification and creating images come with the territory. I have created interactive CD's, media kits, business cards, handouts, and more.

Although I have worked closely with a team, making sure that the job is done correctly and on time was left up to the individual in most of my work environments.

My most recent work is on www.fiverivers.com. If you want to see some of my works, go to www.essive-design.com or contact me and I would be happy to send you some examples!

Work History:

Five Rivers Inc
Boise, ID

March '08 – Current

Title: Graphic Designer

I need benefits for my family...

The Internet Truckstop
